

JHOEVEN KENT ESTALOZA ESCOBAL

FULL STACK DEVELOPER & DIGITAL OPERATIONS SPECIALIST

"Driving digital modernization and localized technical solutions to optimize community and business growth."

Sta. Monica, Siargao Island, Surigao del Norte, Philippines | +639096028169 | escobaljhoeven@gmail.com

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer and Digital Operations professional with a robust background in building scalable web applications, optimizing business workflows, and providing high-tier customer support. Adept in utilizing modern frontend frameworks, backend architectures, and database integrations to build community-focused digital solutions. Proven track record in data management, successfully introducing organization protocols that boosted document retrieval efficiency by 40% as a Virtual Assistant. Experienced Customer Service Representative handling over 1,500 monthly inquiries while slashing repeat calls by 20%. Expertly blends technical engineering with administrative and operational excellence to enhance performance, ensure near-perfect system uptime, and scale modern web initiatives.

KEY COMPETENCIES

Web & Mobile Dev

- Front-end & back-end development
- Website development
- Mobile application development
- Hybrid mobile app architecture
- Web & mobile system design
- WordPress content management & setup
- QA testing & cross-device validation
- Bug identification & resolution
- Application deployment & cloud hosting
- Website maintenance & updates
- Database integration
- System uptime monitoring
- System integration & API implementation
- User access management

AI & Automations

- AI workflow automation setup
- Process workflow automation
- Automated reporting setup
- Email automation setup
- LLM integration & prompting engineering
- AI-driven startup factory support
- Workflow documentation
- Operational process improvement
- Cross-functional team coordination
- Task tracking & digital project timelines
- Internal communication support
- Workflow optimization

Admin & Operations

- Administrative & executive support
- Business operations support
- Calendar management
- Appointment scheduling
- Customer service (phone, email & chat)
- Invoicing & billing support
- Booking management
- Online reservation management
- Data entry & data retrieval
- Report generation & presentation
- Shared document collaboration
- Spreadsheet management

Sales & Commerce

- Sales operations management
- Order processing
- Payment processing
- Returns and refunds processing
- Order status monitoring
- Shipping coordination
- Dispute resolution handling
- Customer account management
- Inventory tracking

Growth & Optimization

- CRM database management
- Form creation & QR code integration
- Lead generation & lead tracking
- Lead management
- Customer segmentation
- Customer journey mapping

Marketing & Strategy

- Social media management
- Audience engagement tracking
- Online community engagement
- Analytics & metrics analysis
- Content strategy development
- Content calendar management

WORK EXPERIENCE

Full Stack Developer • YourGiftNetwork

November 2025 – June 2026

Remote - Nashville, Tennessee, USA

- Spearheaded the layout, architectural design, and system deployment of a scalable interactive social media platform enabling dynamic community updates, public user posting profiles, and high-volume media feeds.
- Designed and optimized mobile application frontends using cross-platform responsive frame components, securing real-time feed responsiveness and high technical mobile engagement.
- Engineered secure data retrieval infrastructures, utilizing custom backend integrations to achieve low latencies and highly fluid user routing transitions.

Virtual Assistant & Web Developer • Pangeon AI Start-Up Factory

March 2024 – October 2025

Remote - Spokane, Washington 99202, USA

- Implemented new cloud-based data organization protocols that increased document retrieval efficiency by 40%, directly supporting faster decision-making processes for executive management.
- Managed administrative tasks, data validation, and documentation updates to ensure seamless start-up operations.

Bank Ambassador • GoTyme Bank

September 2024 – January 2025

Onsite - Siargao Island, Philippines

- Led onboarding initiatives for new digital bank account holders through engaging presentations and tailored consultations, contributing to a 40% boost in new account openings.
- Reduced customer onboarding processing times by 20% through workflow guidance and efficient troubleshooting.
- Acted as a primary point of contact, ensuring brand consistency and secure client-facing data processing.

Customer Service Representative • Eperformax Contact Center Outsourcing

August 2023 – April 2024

Onsite - Cebu, Philippines

- Enhanced customer satisfaction by resolving over 1,500 multi-channel technical and account inquiries monthly through personalized, swift solutions.
- Achieved a 20% reduction in repeat calls by implementing accurate first-contact resolution protocols.
- Boosted positive customer satisfaction feedback scores by 15% within a fast-paced environment.

PROJECT EXPERIENCE

Full Stack Developer • Siargao HireHub

September 2025 – Present

Local Deployment - Siargao Island, Philippines

- Conceptualized and built a central web and mobile job application platform to bridge local talent with expanding businesses in the Siargao Island tourism and hospitality ecosystems.
- Implemented scalable backend solutions using Node.js and Python, supporting a 35% growth in concurrent user capacity while maintaining system uptime above 99.9%.
- Designed clean user pathways using modern frontend tools, utilizing REST APIs to connect a secure MySQL and Postgres infrastructure.

Full Stack Developer • Kuya Pasabuy

March 2026 – May 2026

Local Deployment - Siargao Island, Philippines

- Designed, built, and deployed a localized delivery platform specialized for streamlined order procurement and routing fulfillment inside the regional ecosystems of Siargao.
- Engineered interactive front-to-back system components and database logic structures to support real-time delivery scheduling and request distributions.

Full Stack Developer • TravelTewNews

February 2026 – April 2026

Cloud Production Deployment

- Developed and structured a comprehensive full-site data-driven news aggregator platform dedicated to scraping, centralizing, and dispatching multi-channel travel news feeds.
- Optimized automated routing layouts and secure information indexing mechanisms to provide smooth information loading speeds and device responsiveness.

UI/UX Designer & Developer • Escobal Print Studio

October 2025 – December 2025

Business Production - Siargao Island, Philippines

- Created a complete digital branding suite and sleek, professional business interfaces to optimize ordering pipelines for a localized custom printing studio.
- Formulated clean operational architectures and built custom business tracking automation systems deployed securely via GitHub.

Web Developer • Portfolio Website

January 2026 – February 2026

Cloud Production Deployment

- Designed and deployed a minimalist, high-speed digital portfolio using Astro and Tailwind CSS to feature technical frameworks, dynamic projects, and web engineering capabilities.
- Integrated automated contact triggers and optimized global styling layouts, ensuring high performance scoring and cross-device responsiveness.

EDUCATION

Surigao del Norte State University (Del Carmen Campus)

Graduation Date: June 2026

Bachelor of Science in Information Technology (BSIT)

Sapao National High School

Graduation Date: May 2022

General Academic Strand
